NSF Award Abstract
- #0241380

**Collaborative Research: Seismic Velocity,
Compaction, and Pore Pressure in
Underthrust Sediments, Nankai Subduction Zone**

NSF Org OCE

Latest Amendment Date August 4, 2003

Award Number 0241380

Award Instrument Standard Grant

Program Manager Bilal U. Haq
OCE DIVISION OF OCEAN
SCIENCES

Field Application

Program Reference Code 0000,9150,OTHR,

Abstract

Funds are provided to better constrain in-situ pore pressure, relationship between pore pressure and porosity and compaction state of sediments in the Nankai margin using existing 3-D seismic data. Pore pressure and compaction state of underthrust sediments may be a key control on fault behavior because the decollement localizes at the top of these sediments. The work will provide important information necessary for the drilling of the Nankai seismogenic zone under IODP.
